## EKKO\_View

**Mississauga, ON – January 1, 2009** – *The next generation of EKKO\_View, Sensors & Software's ground penetrating radar (GPR) viewing software, is now shipping.*

EKKO\_View is the workhorse PC program for viewing GPR data acquired with all Sensors & Software's GPR instruments. Viewing of pulseEKKO PRO, Noggin and Conquest data is greatly enhanced with this new software release.

The Version 2 release provides users with a simple and intuitive means to interact with their GPR data. Further, there are a wide range of enhancements including:

- Display multiple images in separate windows
- Linked window scrolling
- Easily display files containing hundreds of thousands of traces
- View data with GPS positioning displayed
- Zoom in/out and pan images
- View raw and gained data traces simultaneously and dynamically with mouse movement
- Use mouse cursor position to display position, depth and signal amplitude
- Export images in many formats with full clipboard integration

The new release works seamlessly with prior generation EKKO\_View Enhanced and Deluxe processing software packages.

With these and many other powerful features, EKKO\_View users will definitely want to upgrade to this newest release.
